SUMMARY

Full-stack-minded developer focused on iOS (Swift, SwiftUI) with proven experience in web development (Next.js, TypeScript, Tailwind CSS). Has shipped consumer apps to the App Store and web products to production, spanning mobile, backend integration, and UI/UX. Apple Swift Student Challenge winner and Apple Developer Academy graduate. Brings clean architecture thinking, fast iteration, and a consistent track record of taking ideas from zero to launch.

EXPERIENCES

Cent-Elektronik

Small Business Owner

Mar 2023 – Present

- Founded and scaled an online electronics store from scratch by conducting thorough market analysis to identify customer needs, developing effective pricing strategies, and building a strong brand identity to stand out from competitors. Continuously improved product offerings and the overall shopping experience to drive growth — resulting in 89+ items sold while maintaining a 5.0 star rating across 48 reviews.

Apple Developer Academy

Junior iOS Developer, Internship

Mar 2024 – Dec 2024

- A hands-on Apple developer program where 7 apps were built and shipped across iOS, iPadOS, and watchOS in 10 months — 3 of which reached the App Store and the rest distributed via TestFlight.
- Projects include:
 - **DariData**
 - Co-founded a retail analytics platform that transforms raw business data into actionable insights, helping Indonesian SME merchants make smarter, data-driven decisions, published to the App Store
 - Tech Stack: SwiftUI, UIKit, Security, Charts, OpenAI, Firebase, Alamofire, Python, GCP, Lottie
 - **Dandenion**
 - Developed a safety companion app for women pedestrians, enabling discreet incident recording and reporting in catcalling-prone areas with real-time location tracking and a dedicated watchOS extension for quick emergency access
 - Tech Stack: SwiftUI, UIKit, SwiftData, CloudKit, MapKit, CoreLocation, WatchConnectivity, Combine, BackgroundTasks, AVFoundation
 - **Cartulator**
 - Built a grocery shopping app tailored for elderly users, combining budgeting, expense tracking, and real-time spending alerts to help them shop confidently within their limits, published to the App Store
 - Tech Stack: SwiftUI, UIKit, SwiftData
 - **PhysiQuest**
 - Wore multiple hats as Developer, UI/UX Designer, and Product Manager; shipped an iPad physics education app with interactive experiments, structured materials, and exercises to make physics more accessible and engaging
 - Tech Stack: SwiftUI, UIKit, SpriteKit, GameplayKit, UserDefaults, Lottie
 - **Find then Guess (FTG)**
 - Developed an AR-powered guessing game that merges real-world exploration with virtual challenges, promoting physical movement and sharpening observational skills, published to the App Store
 - Tech Stack: SwiftUI, UIKit, ARKit, RealityKit, AVFoundation, UserDefaults, Lottie
 - **SCUP**
 - Built an AI-assisted sketching app that empowers users to refine initial sketches into polished illustrations, bridging the gap between raw creativity and professional-quality output
 - Tech Stack: SwiftUI, UIKit, SwiftData, Firebase, AVKit, Python Replicate
 - **Pinion**
 - Created a real-time passenger counter tool for BSD Link bus drivers, improving efficiency and accountability in daily headcount tracking and route management
 - Tech Stack: SwiftUI, Python, TensorFlow

PROJECT

RakitPC

May 2026

- Engineered a web-based PC builder platform with a real-time compatibility engine across 1000+ hardware combinations, enabling users to configure and validate PC builds before purchasing; generated 1,000+ impressions within the initial release

Tech Stack: Next.js, TypeScript, Tailwind CSS, Zustand, Supabase, Vitest, Playwright, Python, Vercel

Aritmath

Apr 2026

- Designed and launched a mental math puzzle game centered on a custom "Single-Digit Rule" mechanic that challenges players to develop flexible number thinking, achieving a 10%+ conversion rate and 100+ organic impressions on initial release — well above industry benchmarks, published to the App Store

Tech Stack: SwiftUI, GameKit, CoreHaptics, Combine, UserDefaults

Hetice

Jun 2025

- Won Apple's Swift Student Challenge by building an accessibility app that bridges the sensory gap for deaf users through real-time sound recognition and haptic feedback, amassing 2,500+ organic impressions and a 55%+ surge in first-time downloads within the global accessibility community, published to the App Store

Tech Stack: SwiftUI, UIKit, AVFoundation, CoreHaptics, UserNotifications, Accelerate

EDUCATION

BINUS University

Bachelor's degree of Computer Science

2021 – 2025

- GPA:** 3.85/4.00 — Magna Cum Laude
- Specialization:** Database Technology
- National Contestant**, ICPC Asia Jakarta 2022

SMA Fons Vitae 1 Marsudirini Jakarta

High School Diploma of Natural Science

2018 – 2021

- Activities and societies:** Scout, Basketball, and Computer Design
- National Science Olympiad (OSN) Participant**, Mathematics (2019) & Informatics (2020)

SKILLS

Programming Languages: C, Swift, Python, SQL, Java

iOS & Apple Platforms: SwiftUI, UIKit, ARKit, MapKit, WatchConnectivity, SwiftData, Charts, CloudKit, BackgroundTasks, GameKit, AVFoundation, Combine

Web: HTML, CSS, JavaScript, Next.js, TypeScript, Tailwind CSS, React, Zustand, Vitest, Playwright

Design: Figma, Adobe, Procreate

Architecture & Tools: MVVM, RESTful API, Swift Package Manager, App Store Connect, Accessibility, Localization, Xcode, Git, Vercel, Notion, GCP, Firebase, Supabase

Spoken Languages: Bahasa Indonesia (Native), English (Proficient), Mandarin (Basic)

CERTIFICATIONS & AWARDS

EF

EF SET C2 Proficient

Nov 2025

Apple

Swift Student Challenge Winner 2025

Jun 2025

HackerRank

Problem Solving (Intermediate) Certificate

Nov 2023

Cognitive Class

Cognitive Class: Introduction to Cloud (Provided by IBM)

May 2023

ICPCID

ICPC – International Collegiate Programming Contest

Nov 2022
